

OUR EXPERTISE IS YOUR ADVANTAGE ON THE ROAD

Model 4-Car NS Day Cab

As domestic vehicle demand has shifted toward pick up trucks and larger SUV's, Cottrell's headramp designs have evolved as well. Our headramp model 4-Car NS has been introduced in our fleet markets over the past couple of years. Built specifically for day cab tractors, the 4-car NS has strategically placed sideframe posts that are intended to optimize door openings on larger vehicles. With wheel pockets and aluminum risers, the 4-Car NS offers our customers industry leading versatility. Don't forget to ask your sales representative about the Telescoping Front Upper #2 option. Call today!
