Hose Products Connection Letter

To: FCG Field Sales, Distribution
Date: June 14, 2018
Subject: Product Obsolescence Notification

Hose Products Division is continuing a path of product simplification to better serve our customers. The launch of the GlobalCore product line a few years ago has been widely accepted. GlobalCore allows us to simplify the product line but retain the ability to cover the market needs. The simplicity, high performance and global reach has driven GlobalCore to become the preferred hydraulic hose in the market.

For Hose Products Division to complete the simplification process, we are announcing the discontinuance of the legacy hydraulic hoses that have been replaced by GlobalCore.

The obsolescence will occur in two phases: one group of hoses in December of 2018 and the final phase in June of 2019. The following contains the hose part numbers and the last day we will fulfill an order containing these products.

December 31, 2018

AX, AM, FX, BXX, 341, 381, 451AR, 462, 492, 701, 711, 731, 781, 772TC, 772ST, 772LT, 782TC, 782ST, 791TC, 791ST, 792TC, 792ST, P35

June 28, 2019

351TC, 351ST, 431, 451TC, 451ST, 721, 721TC, 721ST

Thank you for your business.

April 12, 2019

After performing tests in compliance with SAE J343, Parker Hose Products Division approves the use of 42 Series field attachable fittings for select sizes of 387TC. Further testing details can be found in the attached test reports. For in-depth 42 Series assembly instructions, please refer to Section B in Catalog 4400. The table below shows the compatible fitting series for 387TC-6, 387TC-8, and 387TC-10.

	Crimp Fitting	Field-Attachable Fitting
387TC-6	43/48 Series	42 Series
387TC-8	43/48 Series	42 Series
387TC-10	43/48 Series	42 Series

Please contact your Hose Products Division Product Sales Manager if you have any questions or concerns.

Thank you for your support and business.

July 3, 2019

Parker Hannifin is committed to providing value for its customers and offering a variety of cover options to fit our customers' applications is an example of how Hose Products Division is carrying out this goal. Hose Products Division offers different cover options in our new GlobalCore product line. Our Standard Cover is a durable synthetic rubber that provides protection from light abrasion, as well as other harmful environmental conditions like UV and ozone. Our ToughCover is 80 times more abrasion resistant than our Standard Cover, providing increased abrasion resistance for applications in demanding conditions. Parker's legacy 431 hose has a Standard Cover and 387TC has a ToughCover, which has all the advantages outlined above.

We thank you for your business and look forward to continuing to service your account into the future.

Please direct all questions to your Hose Products Division Product Sales Manager.
